Career Objective

Aspiring Software Development Engineer with a strong foundation in **full-stack web development**, **data structures & algorithms**, and object-oriented design. Experienced in building, deploying, and maintaining production web applications end-to-end using Java and Python/Flask, REST APIs, and modern frontend tooling.

Experience

Front-end AI Engineering Intern *FlyRank AI* Remote | 2026 – Present

- Developed AI-assisted web applications and interactive React interfaces using modern AI-driven coding workflows for implementation, iteration, debugging, and optimization.
- Applied prompt engineering and AI workflow design to real-world development tasks, including structured prompting, prompt ladders, and workflow audits.
- Built and deployed production-ready web experiences with responsive UI, accessibility, performance optimization, and cross-device testing; explored AI agents and Model Context Protocol (MCP) to connect AI systems with tools.
- Maintained production documentation, README files, and deployment workflows for completed applications.

Full Stack Developer Intern *Cognevenge Technologies* Completed

- Contributed to frontend and backend development of a **Course Management System** and an **Enterprise E-commerce Analysis Platform**.
- Developed backend functionality using Node.js, Express, MongoDB/Mongoose, JWT authentication, Stripe, Nodemailer, and Multer.
- Built frontend interfaces using React 18, Vite, Tailwind CSS, and React Router, with data visualization (Recharts) and user feedback (react-hot-toast).

Technical Skills

- **Languages:** Python, Java, JavaScript
- **Web & Full-Stack:** React, Node.js, Express, Flask, REST APIs, JWT, HTML, CSS, Bootstrap, Tailwind CSS, Vite
- **Database:** MongoDB/Mongoose, MySQL, SQLite, PostgreSQL
- **Tools & Platforms:** Git & GitHub, VS Code, Docker, Render, Stripe, Nodemailer
- **CS Fundamentals:** OOP, Data Structures & Algorithms
- **ML / Data (secondary):** Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn, NLP (TF-IDF)

Projects

InterviewAce AI *Flask, Groq API, SQLite, Render* Live

- Architected and deployed a full-stack AI chat application with user authentication, session management, and persistent chat history.
- Integrated the Groq LLM API for real-time conversational responses; diagnosed and resolved production incidents including API auth failures and model deprecation.
- Designed the Flask backend with SQLite storage and shipped it to a live production deployment on Render.

Dezinova – Departmental Club Website *HTML5, CSS3, JavaScript, Responsive Web Design* Live

- Designed and developed the official website for the Computer Science & Design departmental club from scratch, handling complete frontend development and UI implementation.
- Built a responsive, interactive interface with club events, team profiles, magazine resources, galleries, and an integrated AI-powered assistant for exploring club information.
- Deployed and maintained the site on Netlify, making it publicly accessible to students and faculty.

Education

Dr. B.C. Roy Engineering College, Durgapur, India *Expected 2027*

B.Tech in Computer Science and Design

Dhanbad Pranjivan Academy, Dhanbad, Jharkhand, IN *Jul 2020 – Jul 2022*

High School (Science & Math) (**Grade-A**)

Certifications

- Data Analytics – CTTC Bhubhaneswar
- Google Cybersecurity Specialization – Google

Languages Known

English, Hindi, Spanish, French
